EYE CATCHING TEXTURES

Find the right textured look for your next project. From effortless and smooth to crafted with character, visit interstatebrick.com/texture to explore our full line of Thin Brick texture options.

1. Matte

Matte blades are used creating a nearly smooth and lightly pitted texture to highlight the natural minerals in the clay.

2. Antiqued

The rough random ridges of the Antique texture have the appearance of tree bark making it ideal for accents and banding.

3. Rough

Several wires are used to dig down into the face of the brick giving Rough its deep, wide combed, ridge pattern.

4. Smooth

Clay is extruded through a steel die without blades to create a smooth finish, giving the brick a sleek and modern look.

5. Chipotle

Fast moving custom rollers create Chipotle's rugged rolling wave texture, making each brick different in character.

6. Scratch

Several wires are used to create an engraved impression similar to corduroy.

7. Coated

Different clays are used to create a wet slurry that is applied to the face prior to firing, giving Coated brick its old world charm character.
